## Marzocco Strada EP

Redefining the reliability, durability,  
and control of the espresso machine.

# Marzocco Strada EP

## ■ Independent boilers

Separate boilers for each group head allow barista to optimize temperature for individual coffees.

## ■ Exposed Groups

## ■ Perfection of single origins

The aromatic complexity of our blend and the wide range of single origins creates the needs to realize a more stable, reliable, and versatile machine that enabled us to showcase the very best of these coffees. Because of this shift in the market, our technicians have selected the "Strada EP".

The Strada EP, thanks to the Electronic Paddle, has the capability to repeat pressure curves automatically; pressure profiling allows the barista to bring out different flavor components which affect the balance and body of the shot, and produce a rounder, softer espresso that highlights brightness, sweetness and delicate notes.

### Technical characteristics

Available with 2 or 3 groups on all versions.

- Independent Boilers.
- Thermal Stability System.
- Dual PID (coffee and steam).
- Hot Water Economizer.
- Tall Cups.
- Insulated Boilers.
- Exposed Groups.
- Digital Display.
- Proportional Steam Valve.
- Profile Editor.
- Gear Pumps.
- Portafilters & Precision Baskets.
